## SmX-D1 Scenting System

The SmX-D1 scenting system is a versatile unit tailored specifically to themed or show environments allowing DMX control of scent output. The SmX-D1 is constructed with a powder coated extruded aluminum exterior that is aesthetic and durable and can be easily placed and blend within scenic environments.

Using our proprietary Poly Infused cartridges, scents last longer and deliver at higher intensity levels. Combined with our array of specialty scents, the SmX-D1 can be used in a variety of spaces, including small and enclosed spaces to semi-sheltered open spaces.

The SmX-D1 is a single channel unit that allows dry delivery of one scent at a time. Depending on conditions within each space, the SmX-D1 will allow for a maximum average coverage of 3,229 square feet / 300 square meters at full output.

Specifications	SmX-D1
Dimensions:	11" l x 4.7" d x 12.2" h
	280mm l x 120mm d x 310mm h
Weight:	11 lb / 5 Kgs
Input Power:	110/220v, 50/60 Hz
Power Consumption :	35 Watt
Scents:	One
Coverage (approx):	Up to 3,229 sq ft / 300 sq m @ full output (depends on conditions)
Key Features:	Indoor, small space Macro delivery Sleek design Easy controls
Media:	AR/150
Delivery:	Dry delivery, no fall-out
Consumption:	200 hours continuous (*average depends on conditions and settings)
Heating :	Solid state heater, gentle warming
Controls:	DMX control
Warranty:	2 Years

### Applications

4D Theaters  
Dark Rides  
Haunts  
Props

4D Environments  
Interactive Displays  
Billboards  
Immersive Art

Museums  
Simulators  
Experiential Marketing
